

SMU PhD in Computer Science
SMU PhD in Information Systems
School of Information Systems

Research undertaken in these areas:

- Computer Science
 - ◆ Cyber Security
 - ◆ Data Science & Engineering
- Information Systems & Management
 - ◆ Intelligent Systems & Optimisation
 - ◆ Software & Cyber-Physical Systems

You are invited to an Information Talk to learn more about the SMU PhD in Computer Science and PhD in Information Systems programmes!

What to Expect from the Programmes

- **Address deep technology challenges** in real-world information systems that impact business processes or management.
- **Develop tools and methodologies** to translate business goals to technological solutions.
- **Collaborate with** faculty members, fellow students, industry partners and eminent visitors.
- **Work across research areas** (multidisciplinary work).
- Prepare for **careers in R&D units, academic institutions, and the industry.**

The talk will provide you with details on the programmes.

Presenter : Professor ZHENG Baihua
Associate Dean (SIS Postgraduate Research Programmes)
SMU School of Information Systems

Date : 06 November 2020 (Fri)
